

Student Profile

Aaron Birley

Why did you choose to come to Newcastle?

After coming for a visit, Newcastle instantly felt like the right choice. It is a brilliant city with great nightlife and the University boasts a wide range of clubs and societies.

What do you enjoy most at Newcastle?

Everyone is friendly and since the city is very compact, nothing is ever too far away. I like how the University has the city centre on its doorstep. MathSoc has become my second family.

What subjects did you study for A-Level?

Maths, Physics and Business Studies.

What are your favourite modules?

Cryptography in 3rd year has been my all time favourite! I also really enjoyed Chaos in 2nd year.

What are you going to specialise in?

Applied Mathematics.

What do you want to do after Uni?

Teaching. But in the long-run I would also like to try a career in Finance (e.g. Accountancy).

And finally... What is your favourite Maths joke or chat-up line?

Your sine must be $\pi/2$, because you're the one!
