

## Guess the CSI age

Group Number: \_\_\_\_\_

For each picture displayed on the board guess the age and write down your guess in the table below. Later on I will give you the actual age. We will then compute the error ( $|\text{actual} - \text{estimated}|$ ) and the error<sup>2</sup> ( $(\text{actual} - \text{estimated})^2$ ).

Name	Estimated age	Actual age	Error	Error <sup>2</sup>
Jim Brass				
Dr Robbins				
Greg Warrick				
Sara Sidle				
Catherine Willows				
Gil Grissom				
Hodges				
Nick Stocks				
Total	N/A	N/A		

For the lab later on in the week we need the following information:

- Number of males in your group: \_\_\_\_\_
- Number of females in your group: \_\_\_\_\_
- Number of people in your group who regularly watch CSI: \_\_\_\_\_
- What's the average number of years you think your guess is off by: \_\_\_\_\_
