

MAS1403

**Quantitative Methods for
Business Management**

Semester 1, 2016–2017

Lecturer: Dr. Daniel Henderson

Computer Based Assessments (CBAs)

- Last week in the computer practicals you were introduced to the Numbas e-assessment system that you'll be using to do the CBAs.
- The test you did was just a practice to get you used to the software.
- There are **three CBAs** this semester.
- Collectively they count **10%** towards your final mark for this module.
- The timing of the CBAs is given on the module webpage.

Computer Based Assessments (CBAs)

CBA1 is live in “practice mode” as of now!

- When you log into the MAS1403 Blackboard page, under **Numbas Practice Material** you will see a link to **CBA 1 Practice**.
- **CBA 1 Practice** will be available now for the rest of the year – you can practice as many times as you like!
- Next week, you will also be able to access **CBA 1 Assessed** under the Assignments link on the MAS1403 BB page – this is what counts towards your mark for the module!
- The assessed CBA will only be available next week, and you **must** submit your answers to the assessed version by midnight on Friday of next week.
- If you don't have access to the MAS1403 Blackboard page, you must get in touch with me asap!

Other things ...

- Numbas is available via Blackboard both on and off campus (all you need is a web browser).
- You can practice and take the test at any time you like — provided you submit your answers in assessed mode by the deadline (midnight on Friday of next week).
- Back to normal with tutorials this week!

Lecture 3

NUMERICAL SUMMARIES FOR DATA
