• Mark Twain, 1907:

"Figures often beguile me, particularly when I have the arranging of them myself; in which case the remark attributed to Disraeli would often apply with justice and force: 'There are three kinds of lies: lies, damned lies and statistics'."

• Mark Twain, 1907:

"Figures often beguile me, particularly when I have the arranging of them myself; in which case the remark attributed to Disraeli would often apply with justice and force: 'There are three kinds of lies: lies, damned lies and statistics'."

However it seems that Disraeli never actually said this.

"The number of swine flu deaths in Scotland has soared by 40% in just 48 hours, after the Scottish Government confirmed that a further two people died after contracting the virus. Their deaths take the total swine flu fatalities to 14, ..." *Glasgow Herald*, 13 October 2009

"I must write again about the misleading adverts by GMPTE in the papers re the Congestion Charge. In their latest round of propaganda they state there will be a 10 per cent increase in bus services. With 10 councils in Greater Manchester this works out at a one per cent increase per council. If Stockport's bus companies run 200 buses in the morning peak, a one per cent increase will give two extra buses; is that what you want?" Letter to *Stockport Express*, 26 November 2008
